Anton Karmanov

Senior Full-stack / TypeScript Developer | Ex-Exante | FinTech |
Highload | Next.js | NestJS | Vibe Code Cleanup 🛠️👷🔧

Summary

14 years in Software Engineering /
7 years in TypeScript / React /
4 years in Node.js / NestJS /
Algos / Concurrency patterns / Design patterns / Clean architecture /
DDD / SOLID / FSD / DRY / KISS /
Next.js / NestJS / REST / PostgreSQL / Sentry / Docker / React /
Postman / Curl / Telnet / Netcat /
Agile / Scrum / Kanban / Waterfall /
Other is not impossible, just needs some time ;)

Experience

EXANTE

Senior Full-Stack Developer

December 2021 - February 2026 (4 years 3 months)

Limassol, Cyprus

Worked on internal back-office tools for a multi-asset brokerage platform using Next.js and NestJS.

- Collaborated with product managers and end users, gathering and refining business requirements across 6 internal projects, including one major product with a ~2-year development cycle and 5 projects lasting 3–4 months, and translated them into practical product solutions.
- Built complex React interfaces for large-scale data handling, including a multi-megabyte tree table with partial loading and virtualization, keeping the UI responsive with 10,000+ rows and nodes visible.
- Developed and maintained a NestJS backend service supporting internal products and brokerage platform business workflows.
- Formalized and documented critical processes that previously had no documentation, simplifying onboarding and reducing reliance on tribal knowledge.

Admitad

Senior Full-Stack Developer

October 2018 - October 2021 (3 years 1 month)

Munich

Contributed to 4 products in the Admitad ecosystem, combining front-end delivery, legacy modernization, and selected backend development in Laravel-based systems.

- Shipped new functionality and refactored existing code across 2 React applications, including SSR projects and Redux-Saga based flows.
- Implemented selected backend tasks in Laravel, contributing to business logic, internal tooling, and integrations.
- Mentored 2 junior developers through onboarding, code reviews, and day to day technical support.
- Migrated 2 MVP products to Next.js and Nuxt, improving performance, maintainability, and SEO readiness.
- Added automated tests for critical user flows, reducing regression risk in core business scenarios.

Loymax

Middle Frontend Developer

April 2017 - September 2018 (1 year 6 months)

Paphos, Cyprus

Worked on a customer loyalty CRM system and personal accounts for several retail chains.

- Developed and maintained frontend features for CRM and personal accounts.
- Unified JavaScript logic across multiple branded personal accounts.
- Added stylelint, ESLint and Babel to the AngularJS project.
- Periodically supported backend functionality using Yii (PHP)

Wow digital agency

Junior / Middle Frontend Developer

February 2012 - March 2017 (5 years 2 months)

Novosibirsk, Russia

Developed websites and internal tools for agency clients.

- HTML/CSS layout, JavaScript behaviour and UI animations in collaboration with designers.
- Helped other technologists with implementation and debugging.
- Built an outstaffing intranet system using AngularJS.

Education

Kuzbass State Technical University

Bachelor of Technology - BTech, Computer Software
Engineering · (2006 - 2011)
